Tailor it to my café ↗

Find it. Fit it. Make it yours.

Many owners have everyday problems that off-the-shelf tools don’t quite solve — and custom software can feel too expensive or complicated.

- **Costly**
- **Generic**
- **Difficult to Access**

BizUni connects real business needs with prototypes students have already built.

Live transcript (or paste one)

Lina: Hi Areeba, thanks for joining. I want to talk about StockSync for the bakery.
Areeba: Of course! The standard price is RM480, and it moves with how much you want changed.
Lina: We need batch expiry tracking, and alerts to our suppliers when flour runs low.
Areeba: Nice. Barcode scanning too? That would be 3 changes, so about RM600 in total.
Lina: Yes, let us include barcode scanning.

End and summarise
